Gson 是 Google 提供的用来在 Java 对象和 JSON 数据之间进行映射的 Java 类库。可以将一个 JSON 字符串转成一个 Java 对象，或者反过来。

jar和源码下载地址: <http://code.google.com/p/google-gson/downloads/list>

实体类:

[java]

01.

[java]

```
01. public class Student {
02.     private int id;
03.     private String name;
04.     private Date birthDay;
05.
06.     public int getId() {
07.         return id;
08.     }
09.
10.     public void setId(int id) {
11.         this.id = id;
12.     }
13.
14.     public String getName() {
15.         return name;
16.     }
17.
18.     public void setName(String name) {
19.         this.name = name;
20.     }
21.
22.     public Date getBirthDay() {
23.         return birthDay;
24.     }
25.
26.     public void setBirthDay(Date birthDay) {
27.         this.birthDay = birthDay;
28.     }
29.
30.     @Override
31.     public String toString() {
32.         return "Student [birthDay=" + birthDay + ", id=" + id + ", name="
```

```
33.         + name + "];";
34.     }
35.
36. }
```

测试类:

[html]

```
01. import java.util.ArrayList;
02. import java.util.Date;
03. import java.util.List;
04.
05. import com.google.gson.Gson;
06. import com.google.gson.reflect.TypeToken;
07.
08. public class GsonTest1 {
09.
10.     public static void main(String[] args) {
11.         Gson gson = new Gson();
12.
13.         Student student1 = new Student();
14.         student1.setId(1);
15.         student1.setName("李坤");
16.         student1.setBirthDay(new Date());
17.
18.         // //////////////////////////////////////
19.         System.out.println("-----简单对象之间的转化-----");
20.         // 简单的bean转为json
21.         String s1 = gson.toJson(student1);
22.         System.out.println("简单Bean转化为Json===" + s1);
23.
24.         // json转为简单Bean
25.         Student student = gson.fromJson(s1, Student.class);
26.         System.out.println("Json转为简单Bean===" + student);
27.         // 结果:
28.         // 简单Bean转化为Json==={"id":1,"name":"李坤","birthDay":"Jun 22, 2012 8:27:52 AM"}
29.         // Json转为简单Bean===Student [birthDay=Fri Jun 22 08:27:52 CST 2012, id=1,
30.         // name=李坤]
31.         // //////////////////////////////////////
32.
33.         Student student2 = new Student();
34.         student2.setId(2);
35.         student2.setName("曹贵生");
36.         student2.setBirthDay(new Date());
37.
38.         Student student3 = new Student();
39.         student3.setId(3);
40.         student3.setName("柳波");
41.         student3.setBirthDay(new Date());
42.
43.         List<Student> list = new ArrayList<Student>();
44.         list.add(student1);
45.         list.add(student2);
46.         list.add(student3);
```

```
47.
48.         System.out.println("-----带泛型的List之间的转化-----");
49.         // 带泛型的list转化为json
50.         String s2 = gson.toJson(list);
51.         System.out.println("带泛型的list转化为json==" + s2);
52.
53.         // json转为带泛型的list
54.         List<Student> retList = gson.fromJson(s2,
55.             new TypeToken<List<Student>>() {
56.             }.getType());
57.         for (Student stu : retList) {
58.             System.out.println(stu);
59.         }
60.
61.         // 结果:
62.         // 带泛型的list转化为json==[{"id":1,"name":"李坤","birthDay":"Jun 22, 2012 8:28:52 AM"},
{"id":2,"name":"曹贵生","birthDay":"Jun 22, 2012 8:28:52 AM"}, {"id":3,"name":"柳
波","birthDay":"Jun 22, 2012 8:28:52 AM"}]
63.         // Student [birthDay=Fri Jun 22 08:28:52 CST 2012, id=1, name=李坤]
64.         // Student [birthDay=Fri Jun 22 08:28:52 CST 2012, id=2, name=曹贵生]
65.         // Student [birthDay=Fri Jun 22 08:28:52 CST 2012, id=3, name=柳波]
66.
67.     }
68. }
```

执行结果:

[plain]

```
01. -----简单对象之间的转化-----
02. 简单Bean转化为Json==={"id":1,"name":"李坤","birthDay":"Jun 22, 2012 9:10:31 PM"}
03. Json转为简单Bean===Student [birthDay=Fri Jun 22 21:10:31 CST 2012, id=1, name=李坤]
04. -----带泛型的List之间的转化-----
05. 带泛型的list转化为json==[{"id":1,"name":"李坤","birthDay":"Jun 22, 2012 9:10:31 PM"},
{"id":2,"name":"曹贵生","birthDay":"Jun 22, 2012 9:10:31 PM"}, {"id":3,"name":"柳
波","birthDay":"Jun 22, 2012 9:10:31 PM"}]
06. Student [birthDay=Fri Jun 22 21:10:31 CST 2012, id=1, name=李坤]
07. Student [birthDay=Fri Jun 22 21:10:31 CST 2012, id=2, name=曹贵生]
08. Student [birthDay=Fri Jun 22 21:10:31 CST 2012, id=3, name=柳波]
```
